Cameron McKenzie

Professional Experience

January 2024 – Present Presidio, Inc

Toronto, ON

Senior IT Analyst – Medical Systems

- Served as a senior systems analyst and solution architect, translating clinical, regulatory, business, and technical requirements into scalable application designs and implementation plans.
- Worked with product teams, clinical stakeholders, software engineers, QA teams, and regulatory specialists to ensure system designs aligned with usability, safety, privacy, and compliance requirements
- Implemented a fully automated build and deploy process for internally facing computer systems hosted on AWS infrastructure

Feb 2021 – Dec 2023 Bombardier Aerospace

Montreal, QC

Senior Technical Lead, Business Aircraft

- Provided technical leadership to developers and system administrators while supporting requirements analysis, solution design, defect resolution, and production implementation planning.
- Supported modernization of legacy enterprise systems by analyzing dependencies, integration points, data requirements, and risks associated with new application platforms or infrastructure changes.
- Worked with engineering, production, quality assurance, and IT stakeholders to gather requirements, assess system gaps, and translate operational needs into functional and technical specifications.

Nov 2018 – Jan. 2021 Leone Inc

Orangeville, ON

Principal Solutions Architect

- Evaluated and improved the computer system build and release process by incorporating DevOps practices, Jenkins CI, continuous delivery workflows, and Maven-based build standardization
- Provided technical guidance to software teams on service design, system integration, deployment readiness, and application modernization best practices
- mentored the software team in the development of REST based microservices developed using Spring Boot and the Spring Data APIs

April 2014 – Oct. 2018 Top Notch IT Shop

Lockhart, TX

Computer Systems Analyst

- Analyzed clinical, administrative, and operational workflows to identify opportunities for improving healthcare information systems, patient data management, and service delivery.
- Supported the design, testing, and implementation of medical information systems, including EHR/EMR platforms, patient portals, claims systems, and clinical reporting tools.
- Monitored post-implementation system performance, user feedback, and operational issues to recommend improvements to clinical and administrative systems.

Cameron McKenzie

Professional Experience

May 2006 – Mar. 2014

Scotiabank

Toronto, ON

Senior Enterprise Systems Engineer

- Worked with business stakeholders, compliance teams, and technology groups to document system requirements, validate application changes, and support testing for banking and financial services systems.
- Analyzed banking transaction workflows, customer account processes, and regulatory requirements to define system improvements for fraud detection, anti-money laundering, and compliance reporting platforms.
- Managed the work of off-shore, Tech Mahindra, software delivery teams, ensuring the deliverables provided were clear and understood, while also inspecting the delivered code, performing code reviews ensuring the *code voice* was consistent with onshore efforts
- Evaluated, analyzed and refactored SOAP based web services that connected data centers in order to achieve stringent NF requirements in the areas of performance, latency, availability and reliability

June. 2003 – April 2006

IBM

Las Vegas, NV

Computer Systems Analyst

- Analyzed business, regulatory, and technical requirements for anti-fraud and anti-money laundering systems used by Fortune 500 companies and government agencies
- Evaluated existing business processes, data flows, and compliance workflows to identify system requirements for fraud prevention and financial crime detection.

August. 2000 – May 2003

Perficient Inc.

Austin, Texas

Computer Systems Analyst

- Analyzed enterprise application requirements and supported the design, development, and deployment of J2EE applications using proprietary and open-source technologies.

Assessed application server environments, identified deployment risks, and recommended configuration changes to improve reliability, compatibility, and maintainability

Oct. 1998 – August 2000

ITI, Information Technology Institute

Halifax, Nova Scotia

Technical Facilitation Specialist for the Enterprise

- The lead technical reference for ITI's Java and DB2 modules, the Technical Facilitation Specialist's role is to provide guidance and subsequently mentor ITI facilitators as they develop computer systems, database clusters and application middleware

Cameron McKenzie

Education

1995-1998 **Durham College**

Business Administration Diploma – Information Systems

Department of Technology: Internet & Multimedia Design, Post Secondary Certificate

Professional Designations

IBM Certified Associate – Rational Application Developer for WebSphere 6

IBM Certified Application – Rational Application Developer for WebSphere 6

IBM Certified Solution Engineer – IBM WebSphere Portal

IBM Certified System Administrator – IBM WebSphere Portal

IBM Certified System Administrator – IBM WebSphere Application Server

Sun Certified Enterprise Architect, Java EE 5 (SCEA)

Professional Scrum Master (PSMII)

Professional Scrum Product Owner (PSPO)

AWS Certified Agentic AI Architect – Professional

AWS Certified Solutions Architect – Professional

AWS Certified DevOps Engineer – Professional

AWS Certified Machine Learning Engineer – Associate

AWS Certified Data Engineer – Associate'

AWS Certified Developer – Associate

AWS Certified CloudOps Engineer – Associate

AWS Certified AI Practitioner

AWS Certification Cloud Practitioner

AWS Certified Security – Specialty

AWS Certified Advanced Networking – Specialty

Microsoft Certified Systems Engineer - Windows NT (MCSE)

Microsoft Certified Professional + Internet - Windows NT (MCP+I)

Microsoft Certified Professional – Windows NT (MCP)
